Research Papers in Sociology

Research Papers in Sociology:
An Introduction to Style and Format

Numbers

The style required for publication in American Sociological Association (ASA) journals is documented in the current third edition of the *ASA Style Guide* (2007). Compared to other popular research styles, such as that of the American Psychological Association, ASA style is simple, uncluttered and easy to use. This may be due in part because "The *Chicago Manual of Style* . . . is the primary reference on which it is based" (ASA 2007:xi). The *Chicago Manual of Style* (CMS) in turn is a barometer of conventional usage, that is, a guide to common sense in writing American English. The *ASA Style Guide* (2007) affirms these goals:

Block Quote

The *ASA Style Guide* emphasizes formal, objective, orderly, and grammatically sound expression. For example, writers should generally avoid writing in the first person, injecting opinion, overstating claims, and overwriting. They should use the active voice, maintain consistency in grammatical constructions, be concrete and specific, aim for creative but smooth composition, and follow standard usages and conventions. Scholarly writing should reflect both intellectual and stylistic rigor. (P. 2)

Headings

FIRST LEVEL-HEADING IN FULL CAPS

Do not begin a paper with the heading *Introduction*, it is understood that all papers begin with an introduction. The style provides for three levels of headings.

Second-Level Heading in Heading Caps and Italics

Some ASA journals do not indent the first paragraph after a heading. You may elect to do the same, but be consistent throughout the text!

Third-level heading in sentence caps and italics. These headings are known as *run-in* or *paragraph headings*. They need not be complete sentences and must end with a period or other appropriate punctuation. Tables are minimally discussed in the *ASA Style Guide*.

Table

Field	1980	2000	% Change	% Male
Computer Science & Engineering	2,747	6,167	55.5	84.4
Education	7,314	6,830	-6.6	35.4
Psychology	3,395	4,095	27.0	32.6
Social Science & History	3,230	4,095	26.8	59.8

^aBureau of the Census 2002:Table 280.

Refer to recent issues of the *American Sociological Review* or the *Chicago Manual of Style* for more information.
